

SPECIALIZATION AT SCALE

Custom Capillary Development for Liquid Sample Handling

Breakthroughs in life sciences demand precision, expertise, and a commitment to quality. Drummond Scientific delivers customizable capillary solutions and precision sample handling devices for a diverse range of laboratory and field applications—with glass pulling that holds inner and outer dimension tolerances tighter than any other on the market.

Customization that Creates and Saves Lives

Engineered for Precision

Our custom manufacturing solutions ensure accuracy and consistency into every device.

Flexible by Design

Choose from a wide range of glass, plastic, and Mylar®-wrapped options, available in multiple treatments and sizes to fit your device requirements.

Controlled Delivery

Predetermined volume markings and micro-dispensing features decrease the risk of error, ensuring consistent performance in every application.

Proven Portfolio

Our catalog includes high-quality, industry-leading products like AquaCap™, HematoClad™, Microcap™, MICROSAFE®, SAFECAP®, and more.

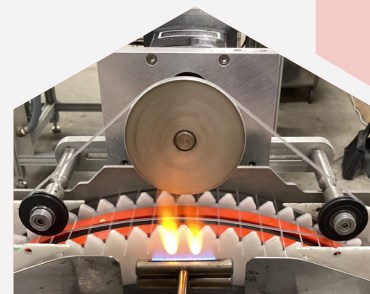

Support that Scales

In-house experts provide the specialized capabilities you need to move seamlessly from prototype to production.

Where Specialization Meets Consistency

- **Versatile capillary solutions** for diagnostics and clinical testing
- **Predetermined volumes**, available in calibrated, end to end, or plugged tubes solutions provide accurate and consistent delivery
- **Mylar® wrap and plastic options** for safer handling
- **Off-the-shelf or fully customized** configurations
- **Anticoagulants and other treatments** available for diverse applications

Scale With Speed and Precision

Let's connect to discuss how our custom capillary solutions can take your innovation further, and learn how you can receive a Sample Handling Development Kit.

Who We Help

Early Stage Innovators

Navigate design and manufacturability with strategic guidance.

Scaling Startups

Agile manufacturing for lab-to-market acceleration.

Established Brands

Extend internal capacity with specialized production support.

Our Facility at a Glance

- **100,000+ sq. ft.** U.S.-based facility
- **80+** custom-built automated lines
- **In-house** engineering, quality control, and automation
- **Climate-controlled environments** with humidity regulation, including access to Class E cleanrooms
- **Custom** packaging, inspection, and traceability systems

What We Manufacture

- Point of Care and OTC Diagnostics
- Precision Sample Handling Devices
- Lateral Flow Assays
- In Vitro Fertilization Products
- Laboratory Equipment & Consumables
- Other Products That Create and Save Lives

Behind the Innovation

Our team drives quality and reliability from early design through full-scale production.
